Feather Touch Premium Luxury Carpet

A polyester carpet that is stain and soil resistant, and provides thermal insulation and sound absorption

A Feather Touch carpet has a soft, plush, and airy texture, mimicking the gentle feel of feathers. It's characterized by:

- Extremely soft fibers
- High pile density
- Lightweight and airy feel
- Gentle cushioning underfoot
- Smooth, velvety surface

Walking on a feather-like carpet feels like stepping on a cloud, with each step sinking softly into the plush fibers.
